Canada Aviation Museum

Centennial of flight

Did you know that 2009 will mark the 100th year of aviation in Canada? In February 1909, the *Silver Dart* took off from Baddeck, Nova Scotia, becoming the first powered, controlled flight of our country. Discover more about the history, the experiments and the people involved in our upcoming exhibit about that important milestone. Scheduled to open February 2009 and kick off a full year of celebration.

What's on November 2008 – April 2009

EXHIBITIONS

Canadian Wings: A Remarkable Century of Flight a new exhibition opening on February 25, 2009

In February 1909, the *Silver Dart* took off from Baddeck, Nova Scotia, becoming the first powered, controlled flight of our country. Discover the history, the experiments and the people involved in aviation starting with that important Canadian milestone.

Brushstrokes and Wingtips: Painting Canada's Skies ongoing

Observe Canada's aviation heritage as well as the impact of aviation on Canadians through the Museum's collection of art and archival photographs. Bring back memories by visiting its companion online version at <http://www.aviation.technomuses.ca/brushstrokes/>.
